Design Your Dream Sofa Piece by Piece

FEYDOM modular sofas consist of several interchangeable elements. You can use them individually or put them together to create the perfect configuration for your space.

You can simply expand your seating area with more elements later! Simply start with the basic elements – seats that you can initially use without additional backrests and cushions. You can add to them over time.

FEYDOM Factory, Macedonia

SOLAR POWER PLANT

In order to cut CO₂ emissions in the atmosphere, FEYDOM started installing photovoltaic panels on our factories' roofs in 2019.

Today, these **power plants produce more electricity** than we spend in our production lines, making the **entire process powered by clean energy.**

FEYDOM[®]

FEYDOM forest, Serbia

FEYDOM FOREST

FEYDOM started planting a forest in 2017.

Each year since then, it is planted **10 hectares of Paulownia trees** in this forest.

Right now **there is a total of 30.000 fast growing trees on a 50 hectare plantation**, which is only the first half of our 100 hectare project we call: **FEYDOM Forest**

Presented in the UAE by **comficasa**

FEYDOM FOREST

A 50 hectare Paulownia plantation
Feydom Forest - Serbia

The goal of this project is to supply required timber while growing **10 trees for each one that is used in our production process.**

The forest now **absorbs 2000 tons of CO₂** annually and the number will rapidly rise in the following years.

SMALL THINGS, BIG CHANGES

Removable covers

Each new FEYDOM sofa system is designed with removable covers that are easy to wash and clean. These removable covers additionally offer the possibility to change the fabric and color of each element. This makes living room makeovers possible without throwing away any part of the existing furniture.

SMALL THINGS, BIG CHANGES

Variety of Fabrics

VELARE

Due to its structure, VELARE offers high abrasion resistance and creates a uniform color feel. The material is also suitable for larger pets that like to jump on the sofa but do not have sharp claws.

 Resistant  Pet friendly  A wide range of colors  Martindale: 100.000

ZINA

ZINA has a fine braided design that makes the material tear and abrasion resistant. Still, it retains a soft texture that feels comfortable.

 Resilient  Pastel colors  Martindale: 100.000

MOLLIA

The MOLLIE covers are made of microfibers that are easy to clean without the use of chemicals. They are suitable for frequently used sofas that are frequently exposed to food, drinks, children and animals with claws.

 Easy Clean  Pet friendly  Martindale: 25.000

Presented in the UAE by **comficasa**

SMALL THINGS, BIG CHANGES

Variety of Fabrics

ALURE

ALURE acts like a thicker knit material and creates a shiny effect. This is achieved due to the presence of two colors of threads in its structure – base color and white color

 Pleasant  Comfortable appearance  Martindale: 40.000

ICON

The ICON material covers have a woven look, which is created by combining two different colors that together create a cozy look. Due to its composition it is very soft and pleasant. It also has a nanoparticle coating that prevents liquids from being absorbed inside

 Easy Clean  Resistant  Pleasant  Martindale: 45.000

PHOENIX

Das PHOENIX-Material besteht zu 90 % aus recyceltem Polyester, das aus recycelten Flaschen gewonnen wird. Außerdem hinterlässt es bei der Herstellung keine Spuren in der Umwelt, da der Herstellungsprozess auf einen Null-Material- und Energieverbrauch abzielt.

 Recycled plastic  Martindale: 30.000

SMALL THINGS, BIG CHANGES

Pocket springs

In order to cut plastic waste pollution, all of our new models also include steel pocket springs in the seats as a replacement for foam. The use of springs reduces polyurethane foam usage by 50% and doubles the longevity of the product.

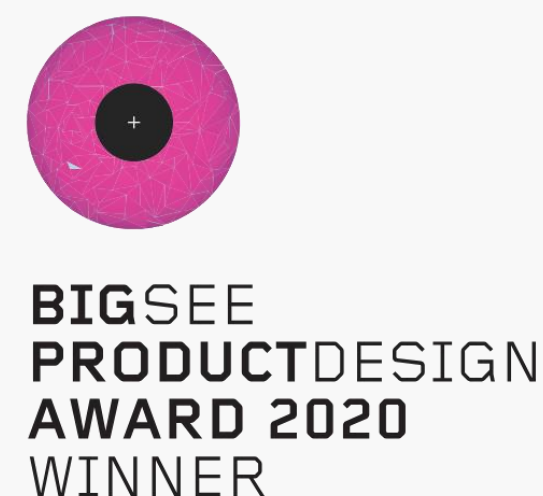

Upcycling

This year, we designed a particular production line for products made from leftover materials, which cut down waste material to the bare minimum.
